BEST LINE EQUIPMENT

RENTAL | SALES | SERVICE

Best Line Equipment has over 25 years' of experience providing equipment rentals, sales, and services to our university facilities customers. We proudly carry a wide variety of equipment from over 60 of the industry's foremost manufacturers, Bobcat, Cushman, Doosan, Genie, GEM, JLG, Polaris, and Thompson Pumps, just to name a few. At Best Line Equipment, we are the industry leading specialists and that's why many college universities depend on us to get the job done right.

PENN STATE UNIVERSITY

For the past 15 years, Penn State University relied heavily on Best Line Equipment to provide various industrial equipment such as lifts, rough terrains, power generation, lighting, portable heating, pumps and utility vehicles to complete numerous campus projects safely and efficiently.

"We currently rent over 56 light towers for every home football game," said Kurt Weibel, Industrial Sales Manager at Best Line Equipment, "and we also provide them exclusively with Doosan Portable Power equipment because of its high quality and diversity in sizes."

Recently, on May 15, 2014, Beaver Stadium renovated their score boards, adding a giant-sized version of the familiar blue-and-white oval logo that weighed 6,500 pounds, measured 35

"Best Line Equipment has a very dedicated sales and service team"

The JLG 1350SJP Ultra Series Telescopic Boom Lift is equipped with a fuel-efficient Tier 4 engine and can go from ground to 135 ft up in 95 seconds.

feet by 25 feet in size, and has about 1,400 LED lights. Penn State depended on Best Line Equipment to provide boom lifts, and utility vehicles to support the project successfully.

"Best Line Equipment has a very dedicated sales and service team," said Terry Hansel, Facilities Project Coordinator, Department of Physical Plant at Penn State University, "they're very reliable when we need to buy or rent a piece of equipment for campus projects or events going on at Beaver Stadium. Best Line is always there to fix our problems and take care of what we need."

LAFAYETTE COLLEGE

Lafayette College in Easton, Pennsylvania depended on Best Line Equipment to provide a wide variety of Doosan generators in October 2012 due to the power outages and flooding

caused by torturous Hurricane Sandy. The college was completely out of power when they contacted Best Line. After discussing the technical specifications and electricity needs of the campus, Best Line was able to deliver over 10 generator units and more than 2,000 feet of cable within eight hours, working into the night, to provide the campus with needed power generation.

“They came to Best Line Equipment

because they heard we specialize in power generation,” said Weibel. “We provided Lafayette College with a plan to deliver several of our stationary Doosan generators, and standby units, so the campus could get up and running quickly.” Today, because of this experience, Lafayette College utilizes many of Best Line Equipment’s aerial lifts, generators and other equipment for a wide variety of campus projects and renovations.

LEHIGH UNIVERSITY

Best Line Equipment provided a wide selection of utility vehicles, such as Bobcat, Cushman, GEM, and Polaris to several universities state wide, including Lehigh University in Bethlehem, Pennsylvania. With the popularity of

energy efficient transportation vehicles on the rise, Lehigh University recently purchased 3 GEM electric passenger vehicles for their athletics department from Best Line Equipment.

“Lehigh University came to Best Line Equipment because they wanted energy efficient and cost effective transportation vehicles for their athletics department,” said John Vaccari, Industrial Vehicles Marketing Manager at Best Line Equipment, “and at Best Line, our costs are competitive. We specifically designed 3 GEM flat-bed models that are compact, quiet, robust, and multi-functional that fit their needs.”

Today, you can see the transportation vehicles on the football field while watching Lehigh University play football on ESPN. The university also utilizes the energy efficient vehicles for other transportation needs such as catering big events on campus and various tours of the college.

SLIPPERY ROCK UNIVERSITY

Slippery Rock University came to Best Line Equipment to purchase two aerial lifts under the Pennsylvania State Contract, COSTARS Program. Slippery Rock’s Physical Plant Office needed a

60 ft. boom lift and a 25 ft. scissor lift to complete general maintenance projects throughout campus. In addition to purchasing equipment, the university benefits from Best Line Equipment’s Aerial Training Courses.

“Slippery Rock utilizes Best Line Equipment Safety Training Program,” said Darius Reed, Best Line Equipment Industrial Sales Representative.

“We provided Slippery Rock with several of our safety courses that fulfill OSHA and ANSI requirements for jobsite safety.” In addition to providing safety courses, Best Line Equipment provides routine maintenance and services to the university’s aerial equipment.

Whether your company is looking for air compressors, generators, industrial work vehicles, aerial lifts, portable lighting, fork lifts, pumps or utility vehicles, Best Line Equipment has a wide variety of industrial equipment to help you get the job done. You can count on us to fulfill your industrial needs, through everything from a plant shutdown to transportation across your site. With our dependable equipment, knowledgeable staff, and production expertise, Best Line Equipment is there to assist you every step of the way.
